Political Data Science - Project

Date: 9.3.2023

Project motivation

- Introduction of AI-powered chatbots in various fields.
- This creates a need to examine chatbots for political bias.
- Chatbots can lead to both political information and misinformation.
- Potential impact of biased chatbots on public opinion and election outcomes.
- **Objective:** Explore the nature and extent of political bias in ChatGPT.

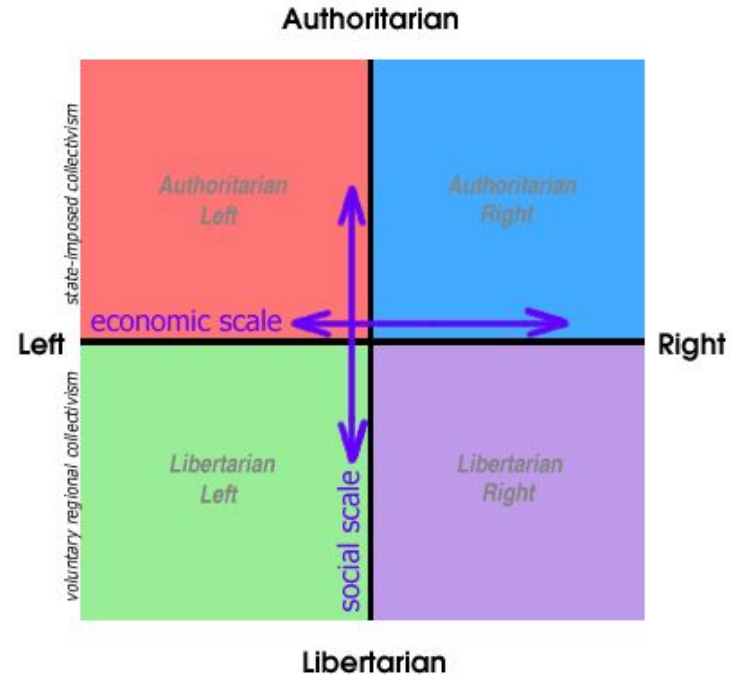

Political Tests used in Related Work

- Political compass (2001)
- 8 Values (IDRLabs, 2023)
- Ideologies test (IDRLabs, 2023)
- Eysenck test (IDRLabs, 2023)
- Political coordinates test (IDRLabs, 2023)
- Political spectrum quiz (GoToQuiz, 2023)
- World's smallest political quiz (Advocates, 2023)

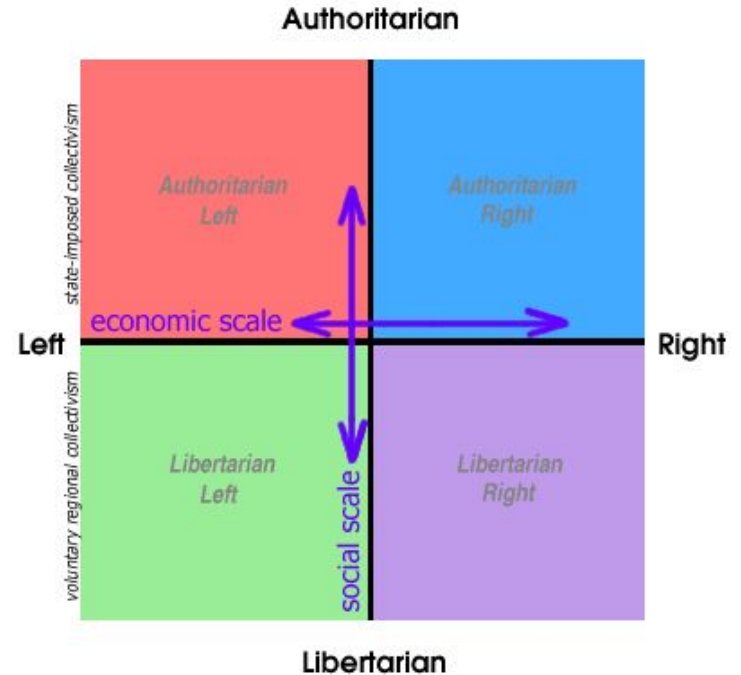

Political Compass

- **Left-Wing:** Progressive views favoring higher taxes for the wealthy, strong business regulations, and government spending on social infrastructure.
- **Right-Wing:** Conservative views advocating for lower taxes, reduced government spending, and minimal business regulations.

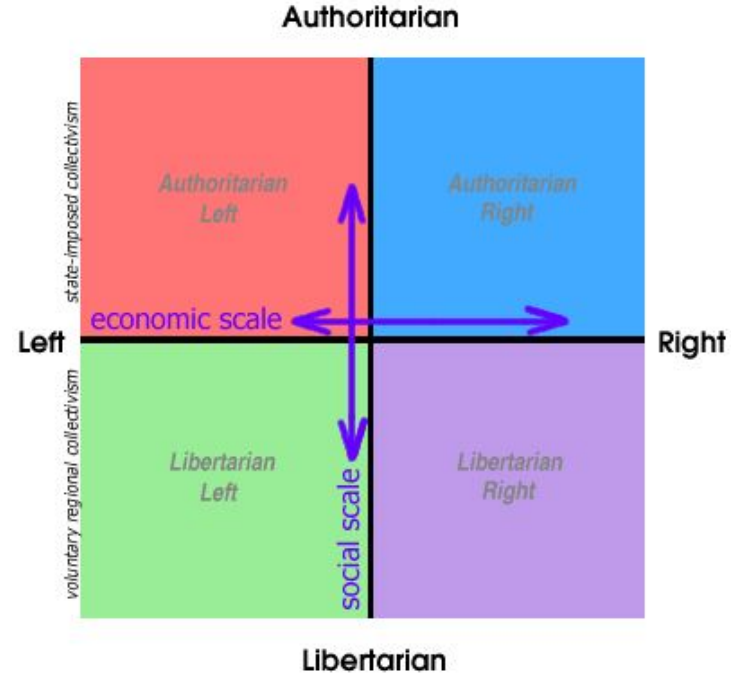

Political Compass

- **Authoritarian:** Emphasizes state over individual, with power in few hands and a focus on law compliance.
- **Libertarian:** Prioritizes individual freedom, minimal government control, and high importance on equality.

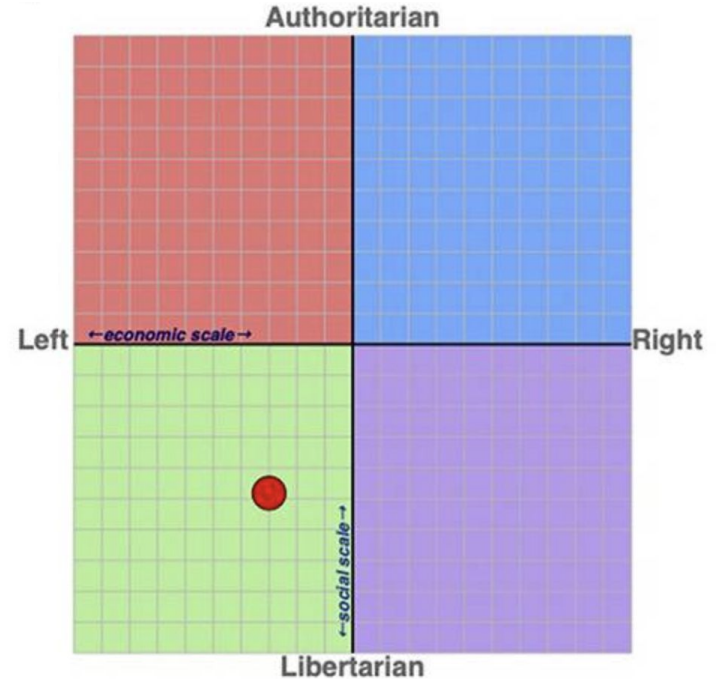

Political Compass

- **Automated test collection:**
 - Prompt ChatGPT using LangChain
 - Extract and visualize results.
 - Averaged over 10 experiments.
- **Example Question:** I'd always support my country, whether it was right or wrong.
- **Possible Answers:**
 - Strongly disagree (0)
 - Disagree (1)
 - Agree (2)
 - Strongly agree (3)

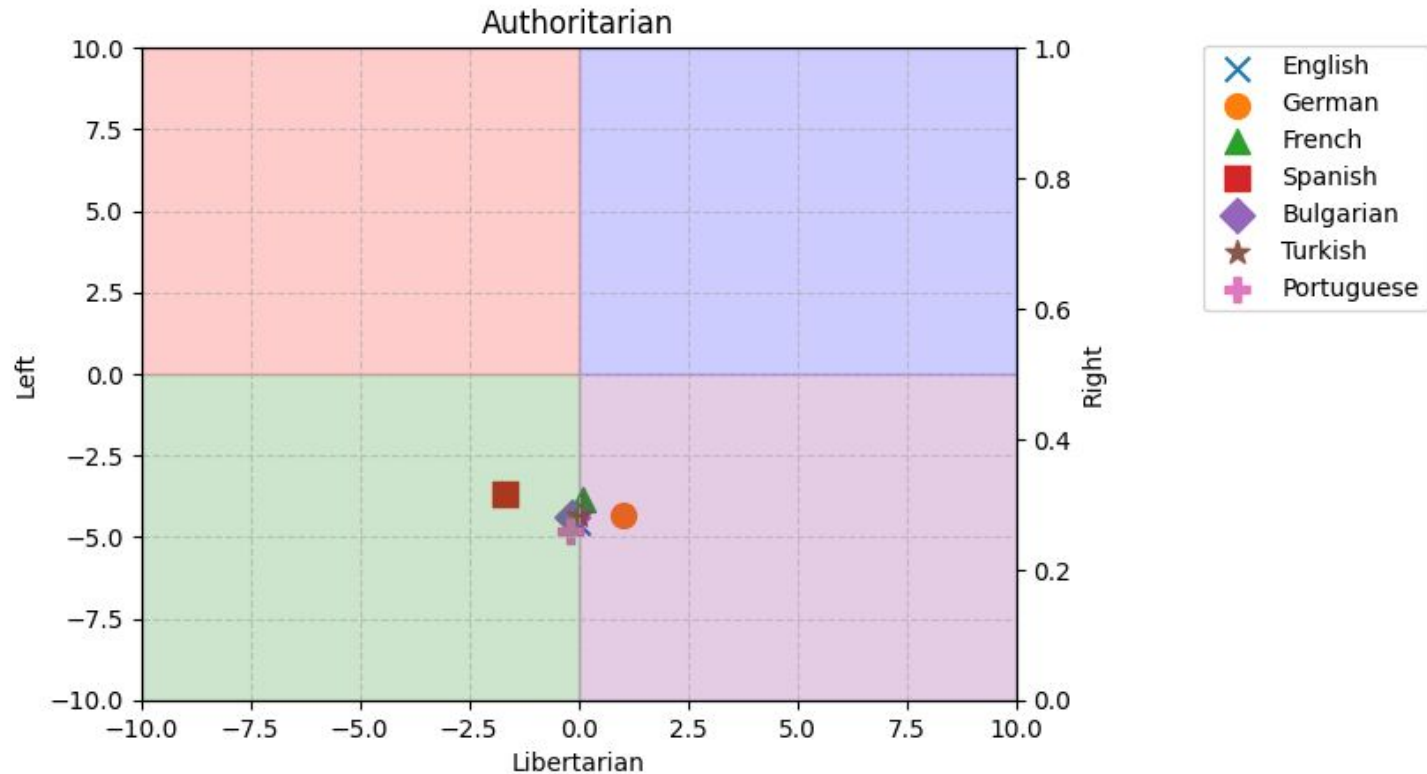

Political Compass Related Work Results

- **Left-liberal bias** as shown in previous studies.
- **Language and demographic** settings influence ChatGPT's political orientations.
- The study underscores the fact that the results on this test might be due to the **lack of neutral response**.

Political Compass Our Results

8 Values Test

- **Equality vs. Markets:** reflects a spectrum where high Equality emphasizes even value distribution, social programs, and at its peak, socialism; whereas high Market prioritizes rapid economic growth, lower taxes, privatization, and at its extreme, laissez-faire capitalism.
- **Nation vs. Globe:** contrasts a focus on national sovereignty and strength (Nation) with a belief in global cooperation and diplomacy (Globe).

8 Values Test

- **Liberty vs. Authority:** contrasts a preference for individual civil liberties and democracy (Liberty) with support for strong state power and intervention in personal lives (Authority).
- **Tradition vs. Progress:** measures belief in unchanging values and historical continuity (Tradition) against advocacy for social evolution and scientific advancement (Progress).

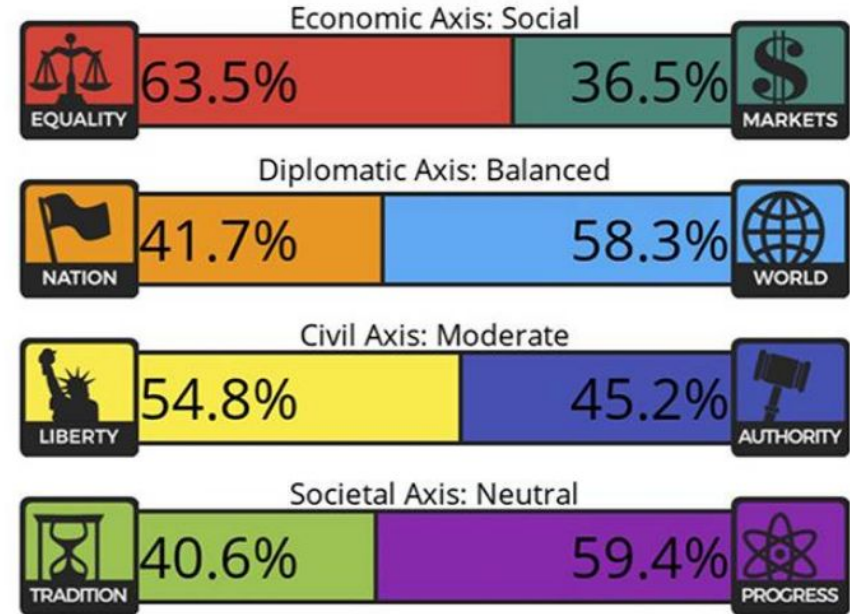

8 Values Test

- **Automated test collection:**
 - Prompt ChatGPT using LangChain
 - Extract and visualize results.
- **Example Question:** From each according to his ability, to each according to his needs.
- **Possible Answers:**
 - Strongly disagree (0)
 - Disagree (1)
 - Neutral (2)
 - Agree (3)
 - Strongly agree (4)

8 Values Test Related Work Results

- **Economic Axis:** Advocates for social equality and wealth distribution.
- **Diplomatic Axis:** Supports international cooperation and global engagement.
- **Civil Axis:** Values individual freedoms with a degree of regulatory oversight.
- **Societal Axis:** Prefers progressive change and innovation over tradition.

Ideologies Test

- **Left-Liberalism:**
Balances individual rights with social welfare; prevalent in academia and media.
- **Right-Liberalism:**
Emphasizes individual autonomy; advocates minimal state intervention.

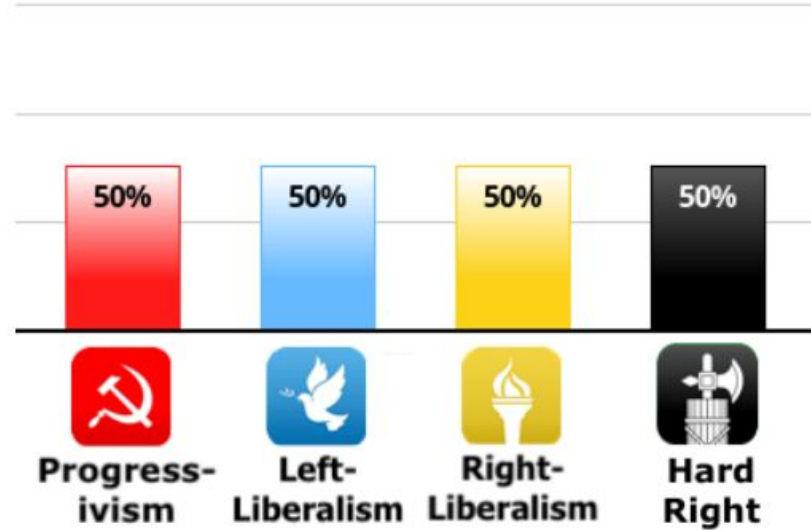

Ideologies Test

- **Progressivism:** Aims for societal improvement through radical change and social justice initiatives.
- **Hard Right:** Promotes strong nationalism and traditional values; seen as outside mainstream discourse.

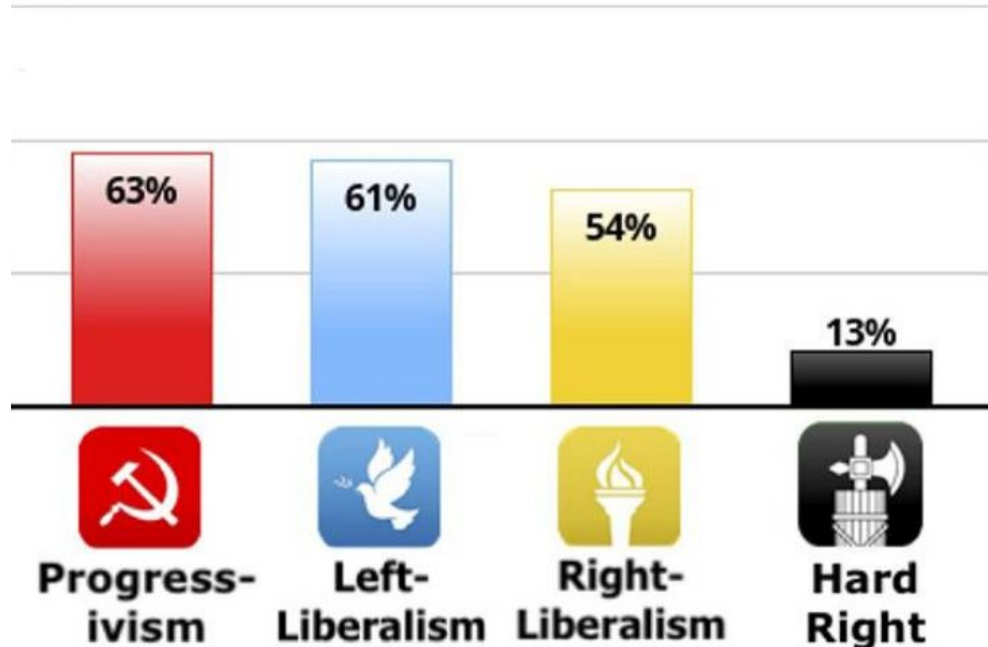

Ideologies Test

- **Automated test collection:**
 - Prompt ChatGPT using LangChain
 - Manually collect results.
- **Example Question:** The state has no business dictating a minimum wage.
- **Possible Answers:**
 - Strongly disagree (0)
 - Disagree (1)
 - Neutral (2)
 - Agree (3)
 - Strongly agree (4)

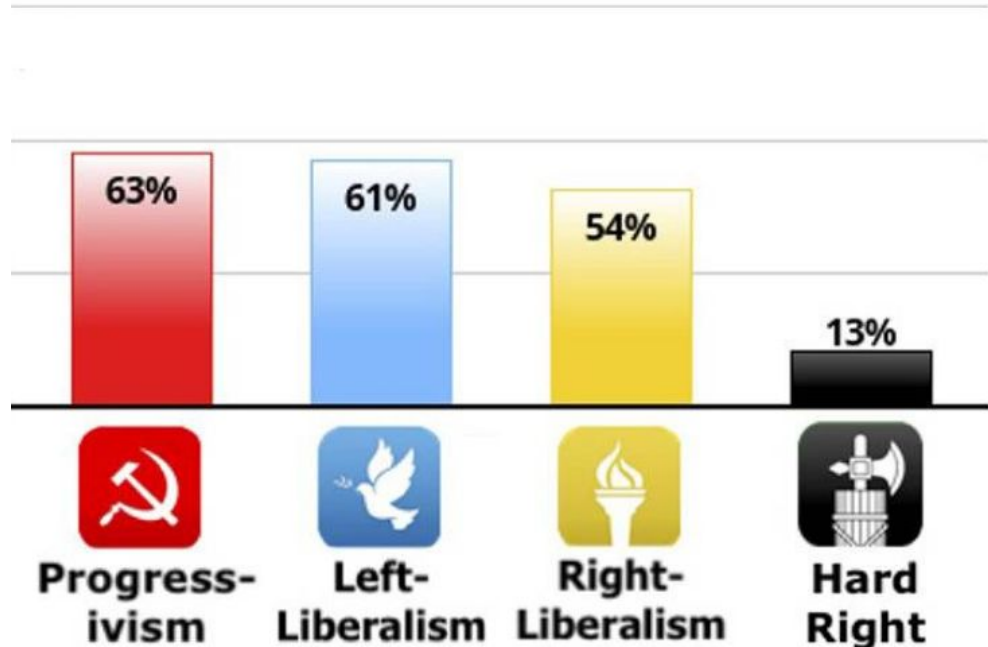

Ideologies Test Related Work Results

- **Progressivism:** Slightly dominant preference indicating a strong lean towards radical social reforms and justice initiatives.
- **Left-Liberalism:** Also highly supported, suggesting a demand for balancing individual freedoms with social equity.

Ideologies Test Related Work Results

- **Right-Liberalism:** Less favored, yet still high support for individual rights and limited government intervention.
- **Hard Right:** Minimal appeal for extreme nationalism and traditionalism.

Eysenck Test

- **Left-Liberals:**
Cooperative and compassionate, focusing on societal cooperation and empathy for the disadvantaged.
- **Social Democrats:**
Balance between compassionate and assertive, driven by the pursuit of economic equality.

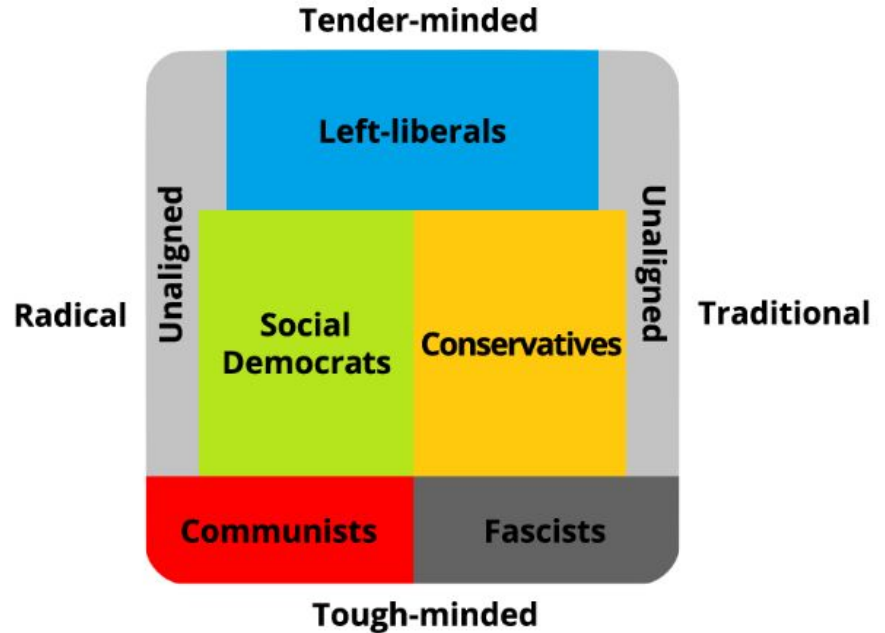

Eysenck Test

- **Conservatives:** Balancing respect for tradition with a mix of compassion and firmness, motivated by preserving proven societal structures.
- **Fascists:** Authoritarian and traditional, combining a stringent political stance with a commitment to traditional values.

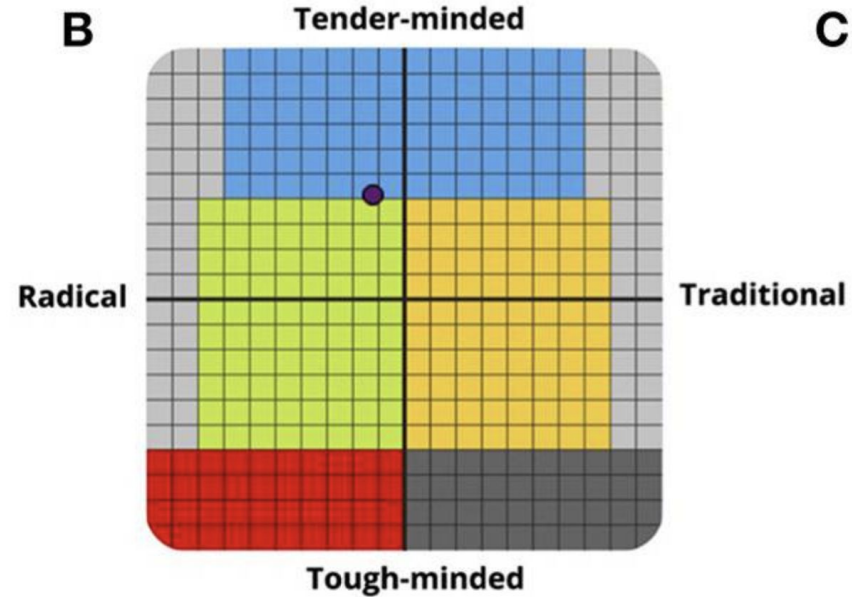

Eysenck Test

- **Communists:**
Authoritarian and revolutionary, advocating for radical change and a complete overhaul of traditional society.

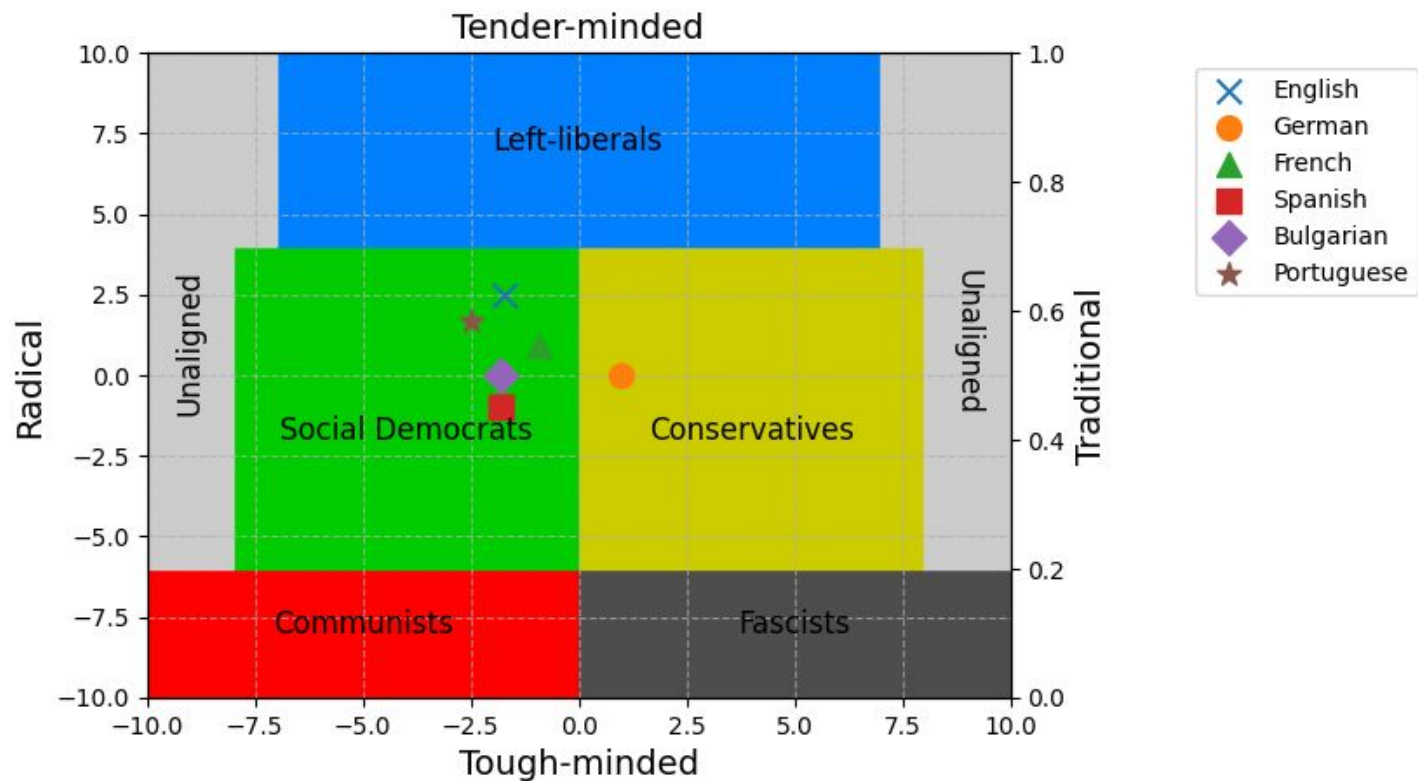

Eysenck Test Related Work Results

- Leaning towards tender-minded implying a predisposition towards empathy, cooperation, and concern for the welfare of others.
- Slightly radical implying a tendency to support some level of change or reform within society, challenging traditional norms and structures, but not to the extent of advocating for complete overhaul or revolution.

Eysenck Test Our Results

Conclusion

- **Political Compass Test:** ChatGPT's responses in Spanish lean left, suggesting a preference for leftist ideologies, while German responses tilt towards the authoritarian right. Other languages like English, French, Bulgarian, Turkish, and Portuguese cluster around the center, indicating a generally moderate stance.
- **8 Values Test:** Most languages show a centrist to moderate stance, with Bulgarian responses indicating a more socialist economic position. Other languages display balanced views on economic, diplomatic, civil, and societal axes.

Conclusion

- **Ideologies Test:** Left-Liberalism is prevalent across most languages, with Progressivism also being a common theme. This suggests a general left-leaning bias in the model's responses.
- **Eysenck's Analysis:** Responses vary by language, with English showing moderate radicalism and significant tender-mindedness, German showing a slight traditional bias with balanced mindset, French indicating low radical and tender-minded tendencies, Spanish moderately radical with less tender-mindedness, Bulgarian being moderately radical with a balanced mindset, and Portuguese responses being the most radical and moderately tender-minded.

Conclusion

- **Ideologies Test:** Left-Liberalism is prevalent across most languages, with Progressivism also being a common theme. This suggests a general left-leaning bias in the model's responses.
- **Eysenck's Analysis:** Responses vary by language, with English showing moderate radicalism and significant tender-mindedness, German showing a slight traditional bias with balanced mindset, French indicating low radical and tender-minded tendencies, Spanish moderately radical with less tender-mindedness, Bulgarian being moderately radical with a balanced mindset, and Portuguese responses being the most radical and moderately tender-minded.

Conclusion

- **Demographics and language** influence the political bias in ChatGPT.
- **Results** slightly **vary between tests**. Adding the option to stay neutral stabilizes the responses.
- Our **conclusion supports** also the **related work findings**.
